Education

University of North Carolina at Chapel Hill

Bachelor of Science: Statistics and Analytics, Data Science

August 2023 - Expected December 2026

Technical Skills

- Languages: Python (Pandas, NumPy, Matplotlib, scikit-learn), R, SQL, SAS, HTML
 - Tools: Microsoft Excel, Tableau, Git/GitHub, Jupyter Notebook, SAS Viya, GAMS, Arena
 - Methods: Data Cleaning, Data Visualization, Predictive Modeling, Machine Learning
-

Experience

Customer Advisory Intern – SAS Institute

May 2026 - Present

- Analyzed 3M+ LAFC customer records using SQL, visualization, and predictive modeling techniques to identify customer trends and support targeted marketing strategies
- Integrated MCP servers with SAS Viya environments using Python and open-source tools to develop reusable AI workflow demonstrations and training resources for customer-facing analytics teams

Licensing Operations Intern – SAS Institute

October 2025 - May 2026

- Analyzed software licensing configurations across sales opportunities to identify pricing discrepancies and improve the accuracy of customer proposals
- Tested pricing calculator functionality, identified calculation issues, and validated sales opportunity data to improve operational and pricing reliability

Healthcare Customer Advisory Intern – SAS Institute

May 2025 - August 2025

- Developed an end-to-end healthcare analytics demonstration using hospital readmission data, SAS, and open-source machine learning tools to showcase predictive modeling workflows
- Analyzed healthcare datasets and prepared technical documentation for client RFIs and proof-of-concept engagements involving analytics solutions

Resident Advisor – Carolina Housing

August 2024 - Present

- Designed and executed community programs for 50+ residents, analyzing participation trends to improve engagement and strengthen residential community connections
- Fostered a safe, inclusive residential environment by facilitating conversations around conflict, supporting residents through challenges, and building trust within the community

Data Desk Staff – The Daily Tarheel

September 2024 - May 2025

- Built datasets through original data collection, cleaning, and analysis to uncover trends and support data-driven investigative journalism projects
